| <b>Project Description:</b><br>(Include a brief summary of the project and the programs it supports.)   | The plan is for a 31,864 square foot innovation and technology center. A two story building designed to support 23 faculty/st and 258 students at peak occupancy. The ITLC building will provide state of the art labs for computer information systems, computer science, cybersecurity, digital media arts and water flow research engineering programs. Included will be classroon labs, offices and support areas for students.  |                                    |  |   |                                    |   |            |  |  |  |  |  |
| <b>Project Status:</b><br>(Include scope or budget changes, phase<br>updates, identified project delivery issues,<br>discussion of critical path for construction and<br>any potential for project cost overruns or<br>claims.)   | Schematic design was completed on 4/25/24. The value engineering report was completed 5/20/24. The pre-design amendment with updated programming, building size and budget estimates was submitted to SBCTC and OFM at the end of June, 2024. OFM approved the updated pre-design on 9/9/24. The project budget C100 was adjusted upward through the updated pre-design approval. As a result of the updated pre-design process, our schedule has slipped by several months. We intend to submit for permit in early 2025 with an expected permit review time of one year. The project would bid in early 202 with construction start in summer 2026. Construction would through December 2027 with occupancy in early 2028. |                                    |  |   |                                    |   |            |  |  |  |  |  |
