BUSINESS_UNIT	VHC_BU_QRY_SEC	VHC_QSEC_UN_ID
BUSINESS_UNIT_HR	VHC_BHR_QRY_SEC	VHC_QSEC_HR_UNT

NOTE: In HCM, this is only needed with Default Prompts or if no embedded security sql and no secure prompt for field. This will cause performance issues if the query already has embedded security sql. Joining to most tables will add embedded security sql in HCM to Company.
